EDUCATION

Faculty of Electrical Engineering and Computing

Zagreb, HR

Master of Science in Computing, Minor in Software Eng. and Information Systems Aug. 2022 – September 2024

PROJECTS

Acimdes | Python

2022

- Developed a network multiplier card game using pure Python, TCP server, and a custom protocol.

Sun Moon Dyn Wallpaper | Rust

2023

- Developed a dynamic wallpaper program that calculates the positions of the Sun, and Moon depending on the time of day. Given the calculated position an image is generated and set as the desktop wallpaper.

Finance Tracker | Rust, SQLite

2026

- Developing a local finance tracker based on Double Entry Book Keeping. SQLite is used as the storage, and main calculation, and validation backend.
